

Template Week 5 – Operating Systems

Student number: 486707

Assignment 5.1: Unix-like

- a) Find out what the difference is between UNIX and unix-like operating systems?

UNIX is proprietary and unix-like is open source.

- b) Study the image above named UNIX timeline. Find out who Ken Thompson, Dennis Ritchie, Bill Joy, Richard Stallman, and Linus Torvalds are and what they have contributed to the development of UNIX or unix-like systems and to IT in general. **TIP!** English-language sources often contain more detailed information about these individuals.

Ken Thompson and Dennis Ritchie designed and implemented the original UNIX OS and C programming language. Bill Joy is creator of the vi text editor and developed BSD UNIX. Richard Stallman started the free software movement. He created the GNU project for making a unix-like open source OS. Linus Torvalds created the linux kernel. He also created Git.

- c) What is the philosophy of the GNU movement?

Free software means that the software's users have freedom. (The issue is not about price.) We developed the GNU operating system so that users can have freedom in their computing.

Specifically, free software means users have the [four essential freedoms](#): (0) to run the program, (1) to study and change the program in source code form, (2) to redistribute exact copies, and (3) to distribute modified versions.

Source: <https://www.gnu.org/philosophy/philosophy.en.html>

- d) Does Ubuntu as a Linux operating system conform to the philosophy of the GNU movement? Please explain your answer.

Not entirely because it utilises some proprietary hardware drivers.

- e) Find out what is the Windows Subsystem for Linux?

It is a feature of Windows to run linux without a virtual machine or dual boot.

- f) Find out, which operating system family belongs to Android, iOS and ChromeOS?

Android and ChromeOS are Unix-like, but iOS is UNIX.

Assignment 5.2: Supercomputers and gameconsoles

- a) Research on this site what supercomputers are used for and write a short summary of it:

<https://www.computerhistory.org/timeline/search/?q=Supercomputer>

Supercomputers use thousands of connected processors for parallel calculations with huge datasets.

- b) IBM is a company that has already built a number of supercomputers. One of them is IBM's Roadrunner. The CPU developed for this supercomputer was further developed at a later stage as the CPU for the PlayStation 3 console. Find out what a **PlayStation 3 cluster** is and what it was used for?

The US airforce clustered 1760 PS3's to create the Condor supercomputer at 1/10th the cost of comparable supercomputers.

- c) You can build a supercomputer by putting a few computers together in a cluster. Here's what Oracle did with a collection of Raspberry Pi's, for example:

<https://blogs.oracle.com/developers/post/building-the-worlds-largest-raspberry-pi-cluster>

What specific operating system is running on this cluster?

Oracle Linux

- d) Does Oracle's Raspberry Pi supercomputer appear in the list of the 500 fastest supercomputers in the world? Make a logical decision for this, without going through the entire list.

<https://www.top500.org/lists/top500/list/2023/06/>

No the supercomputers on the list have tens of thousands of nodes and the Raspberry Pi cluster has 1050.

- e) What CPU architecture is used for the PlayStation 5 and Xbox Series X?

A custom AMD Zen 2 CPU architecture.

What operating systems run on these consoles?

PS5 is Orbis OS which is based on FreeBSD and xbox series x is XBOX System Software which is a custom version of windows.

What conclusion can you draw from the answer to the previous question?

That they resemble regular computers.

Assignment 5.3: Working with Windows

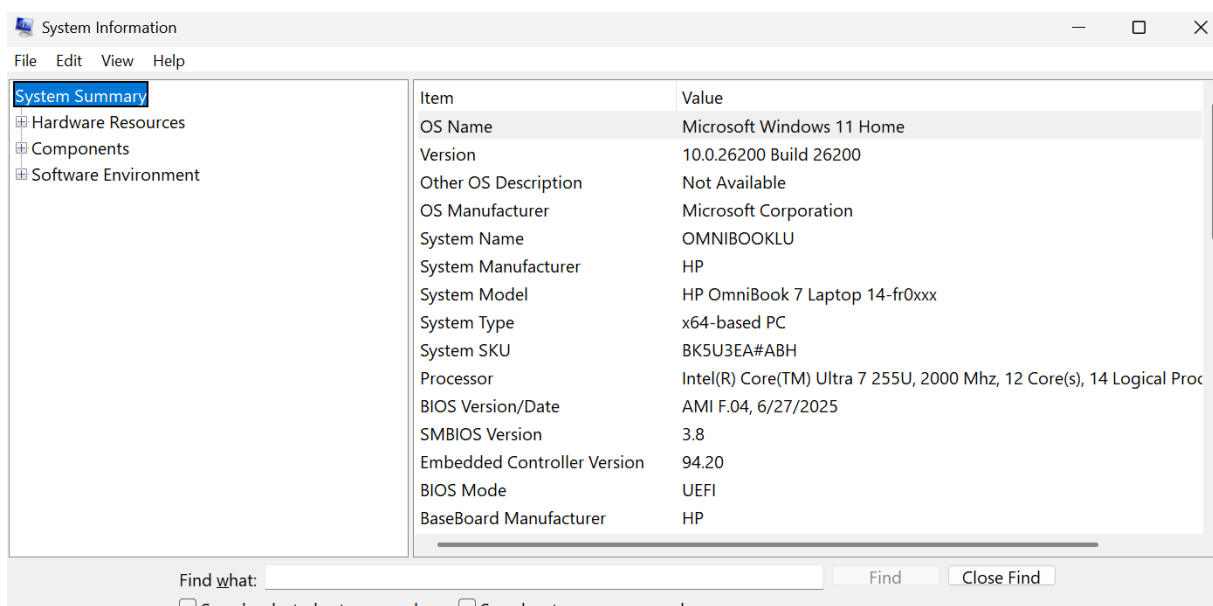

Take relevant screenshots of the assignments below

a) Practice for about 10 minutes with the  keyboard shortcuts combinations, skip the general shortcuts in this exercise. Take a look at which screens are opened.

b) The file explorer can be opened with  + E, Which key combination could you also use?

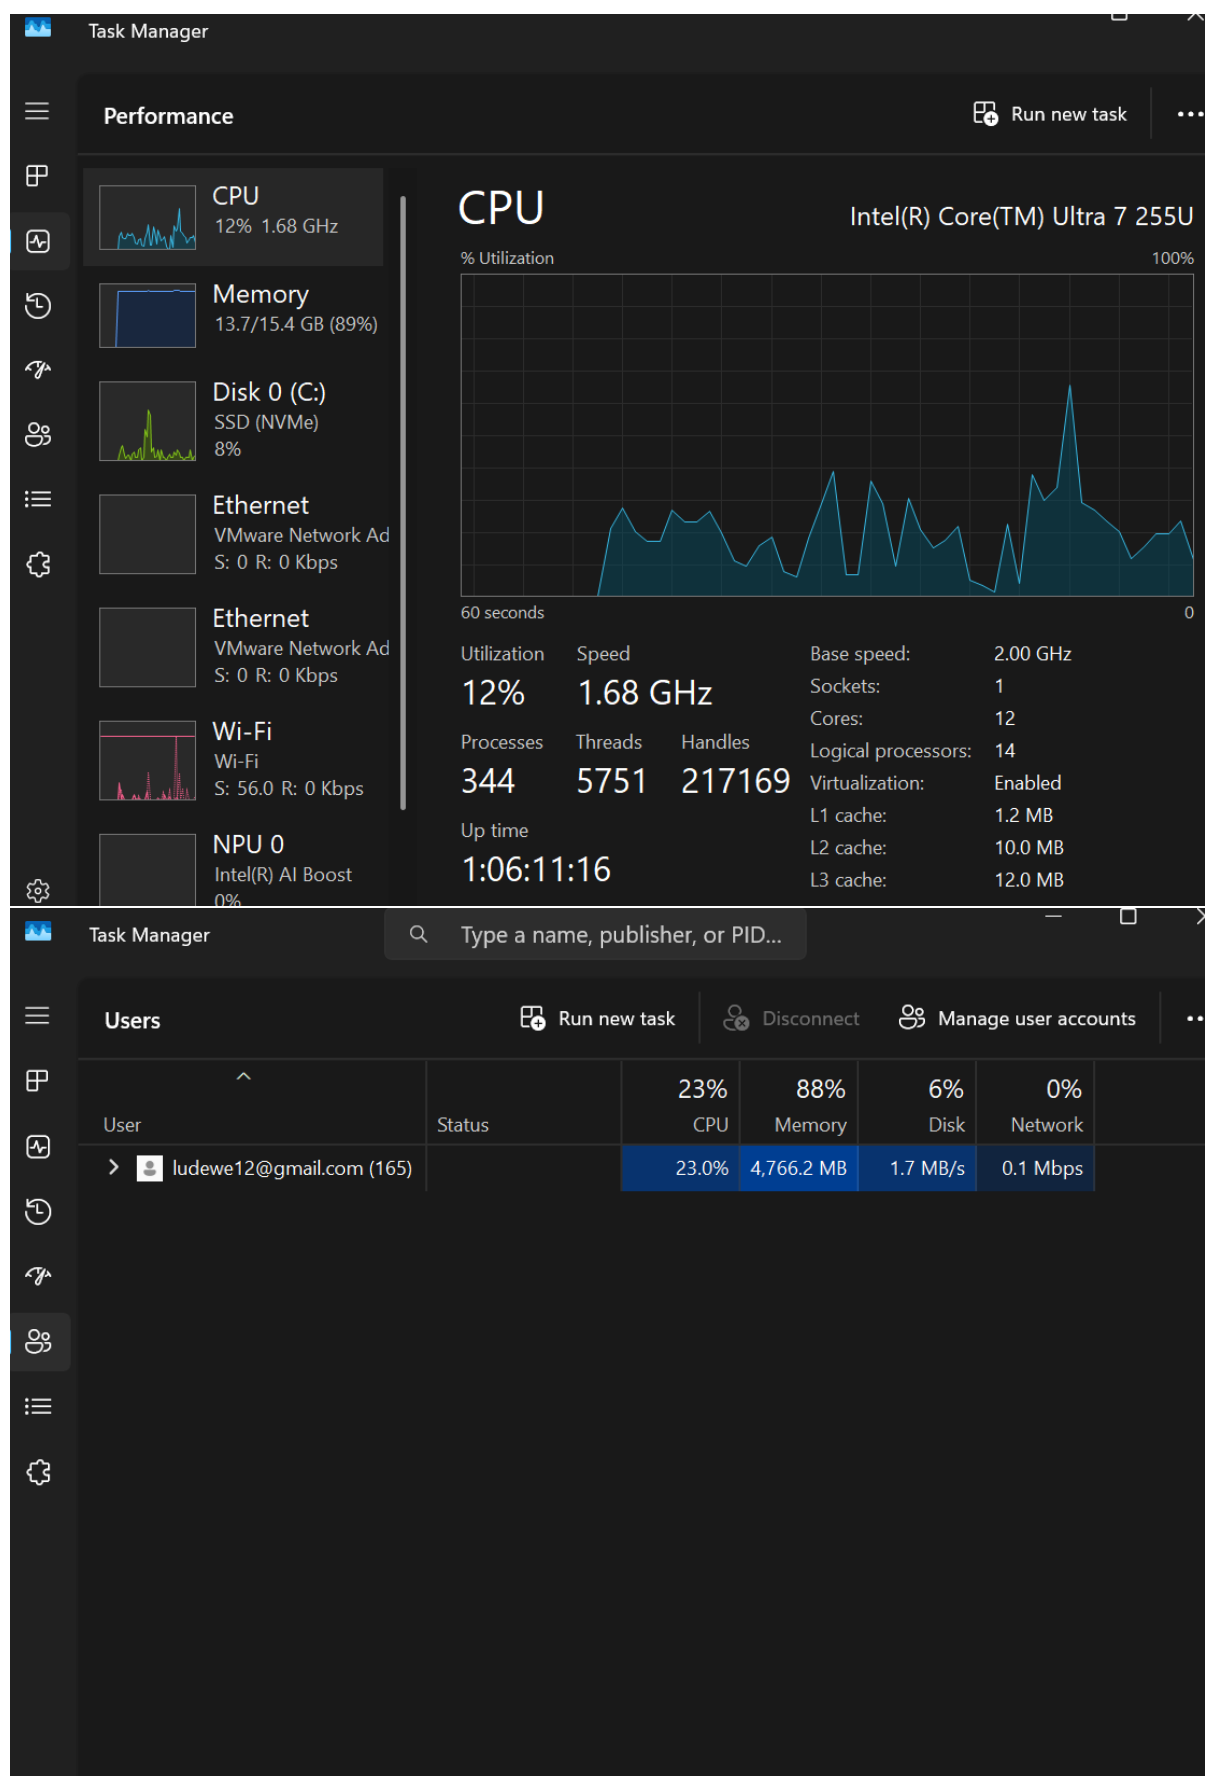

Windows key + X + E

c) Open the system properties with a  key combination, take a screenshot of the open screen. Paste this screenshot into this template.

d) Open task manager with a key combination. Take screenshots of the tabs: processes (shows active processes), performance, and users. Place these three screenshots in this template.

Task Manager						
Type a name, publisher, or PID...						
Processes						
Run new task End task Efficiency mode						
Name	Status	7% CPU	89% Memory	33% Disk	0% Network	
Apps (13)						
> AVG Antivirus (6)		0%	65.1 MB	0.1 MB/s	0 Mbps	
> Brave Browser (31)		0%	2,102.4 MB	0.1 MB/s	0.1 Mbps	
> IntelliJ IDEA Community Edition		0%	1,269.3 MB	0 MB/s	0 Mbps	
> Microsoft Management Cons...		0%	1.8 MB	0 MB/s	0 Mbps	
> Notepad.exe		0%	4.1 MB	0 MB/s	0 Mbps	
> Paint		0%	5.7 MB	0 MB/s	0 Mbps	
> Steam Client WebHelper (7)		0%	85.9 MB	0 MB/s	0 Mbps	
> System Information		0%	2.8 MB	0 MB/s	0 Mbps	
> Task Manager		1.6%	98.4 MB	0.1 MB/s	0 Mbps	
> Telegram Desktop		0%	30.4 MB	0 MB/s	0 Mbps	
> Terminal (2)		0%	2.8 MB	0 MB/s	0 Mbps	
> VMware Workstation (32 bit) (3)		0%	5.6 MB	0 MB/s	0 Mbps	
> Windows Explorer		0%	76.3 MB	0 MB/s	0 Mbps	
Background processes (117)						

- e) If you're giving a PowerPoint presentation and you connect your laptop to a projector, Windows can use the projector as a second screen. For example, you may have Outlook open on your first

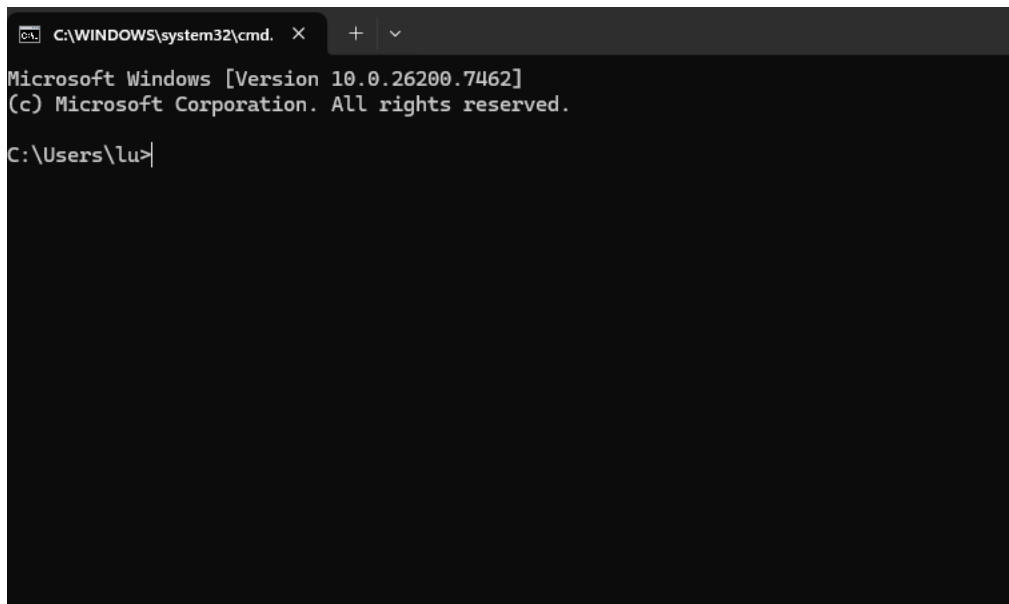

screen that you don't show over the projector, while the PowerPoint presentation is displayed on the projector, or the second screen. Which key combination should you use for this?

Windows + P and then extend

- f) If you leave the classroom for a while and you leave your laptop behind, it is wise to lock the screen. Your Apps will continue to run in the background. So, for example, if you're waiting for a download that takes a while, lock the screen and get a cup of coffee. Which key combination do you use for this?

Windows + L

- g) Open the Run screen with a key combination. On this screen, type CMD and press <enter>. Take a screenshot of this result and paste it into this template.

```
C:\WINDOWS\system32\cmd. X + v
Microsoft Windows [Version 10.0.26200.7462]

Assignment 5.4: Working with Linux

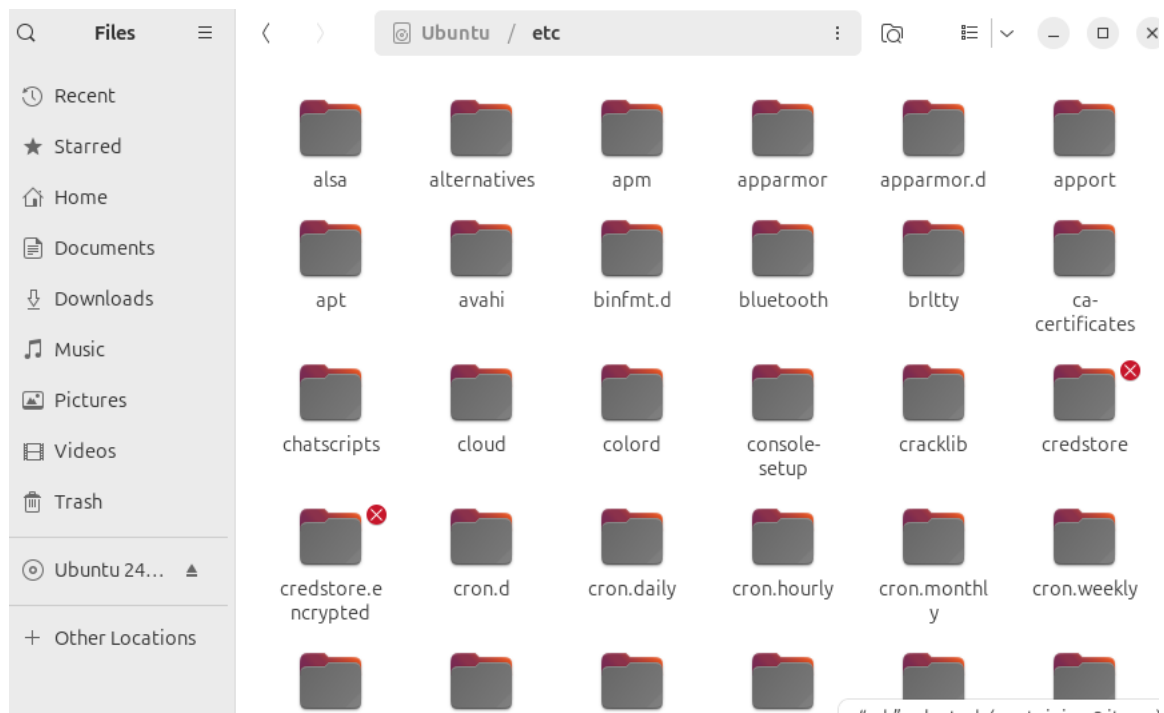

Relevant screenshots + motivation

- Copying files

```
ludewe@ludewe-VMware-Virtual-Platform:~$ pwd
/home/ludewe
ludewe@ludewe-VMware-Virtual-Platform:~$ ls
5.4_doc.txt  Documents  Music      Public    simple.o  Templates
Desktop      Downloads  Pictures   simple.c  snap      Videos
ludewe@ludewe-VMware-Virtual-Platform:~$ mv -i 5.4_doc.txt /home/ludewe/Documents
ludewe@ludewe-VMware-Virtual-Platform:~$ ls Documents
5.4_doc.txt  code
ludewe@ludewe-VMware-Virtual-Platform:~$
```

- Navigating the file structure

```
ludewe@ludewe-VMware-Virtual-Platform:~$ cd /etc
ludewe@ludewe-VMware-Virtual-Platform:/etc$
```

```
ludewe@ludewe-VMware-Virtual-Platform:/etc$ cd
ludewe@ludewe-VMware-Virtual-Platform:~$ pwd
/home/ludewe
ludewe@ludewe-VMware-Virtual-Platform:~$
```

Windows has separate drive directories while Linux has a single root directory.

The /etc folder is used for configuration files.

- Compress files

o Which command in the terminal would you use to compress a text file into a tar archive?

```
tar -czvf 5.4_doc.tar.gz 5.4_doc.txt
```

o With which command in the terminal would you be able to extract a tar file?

```
tar -zxvf 5.4_doc.tar.gz
```

o Compress a text file in a tar archive and compress it with gzip.

`tar -zxvf 5.4_doc.tar.gz`

```
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$ tar -zcvf 5.4_doc.tar.gz 5.4_doc.txt
5.4_doc.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$ rm 5.4_doc.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$ tar -zxvf 5.4_doc.tar.gz
5.4_doc.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$
```

```
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$ rm 5.4_doc.tar.gz
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$ gzip 5.4_doc.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$ gzip -d 5.4_doc.txt.gz
ludewe@ludewe-VMware-Virtual-Platform:~/Documents$
```

- View processes

o Install the application htop via a terminal command

o Launch the htop application. Explain what this application shows.

```
ludewe@ludewe-VMware-Virtual-Platform: ~/Documents

Assignment 5.5: Users and permissions on Linux

```

ludewe@ludewe-VMware-Virtual-Platform:~/Downloads/hello$ chmod +x hello.sh
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads/hello$ ./hello.sh
Hello Ludewe, 486707!
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads/hello$ chmod 744 hello.sh
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads/hello$

```

Assignment 5.6: View the contents of files

Relevant screenshots + motivation

For this assignment, you can use the following commands: cat, wc, less, tail, head & grep.

- What does each of these commands do? Write it out for yourself.

Cat concatenates the whole file together as output. Wc does a word count, it shows lines, words and bytes. The less command shows the file by page so you can read it more easily. Tail shows the last 10 lines of the file. Head shows the first 10 lines of the file.

- Download the file SherlockHolmes.txt from Brightspace and place it in a directory on your VM. Or download the file directly from <https://www.gutenberg.org/files/1661/1661-0.txt>. Use the commands cat, wc, less, tail, head & grep for the following assignments:

- How many lines does the file have? How many words? And how many characters?

```

12306 107562 593731 SherlockHolmes.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ wc -l SherlockHolmes.txt
12306 SherlockHolmes.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ wc -w SherlockHolmes.txt
107562 SherlockHolmes.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ wc -m SherlockHolmes.txt
593731 SherlockHolmes.txt
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$

```

- On which lines is the word "kingdom" in the file? TIP! grep -n

```

ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ grep -n "kingdom" SherlockHolmes.txt
490:"I tell you that I would give one of the provinces of my kingdom to
1124:And that was how a great scandal threatened to affect the kingdom of
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$

```

- Use the head and/or tail commands to see the 10 lines above and below the word "kingdom" on the screen.

```
ludewe@ludewe-VMware-Virtual-Platform: ~/Downloads

he King stared at him in amazement.

Irene's photograph!" he cried. "Certainly, if you wish it."

I thank your Majesty. Then there is no more to be done in the matter.
I have the honour to wish you a very good morning." He bowed, and,
turning away without observing the hand which the King had stretched
out to him, he set off in my company for his chambers.

and that was how a great scandal threatened to affect the kingdom of
Bohemia, and how the best plans of Mr. Sherlock Holmes were beaten by a
woman's wit. He used to make merry over the cleverness of women, but I
have not heard him do it of late. And when he speaks of Irene Adler, or
when he refers to her photograph, it is always under the honourable
title of _the_ woman.

I. THE RED-HEADED LEAGUE

Assignment 5.7: Digital forensics

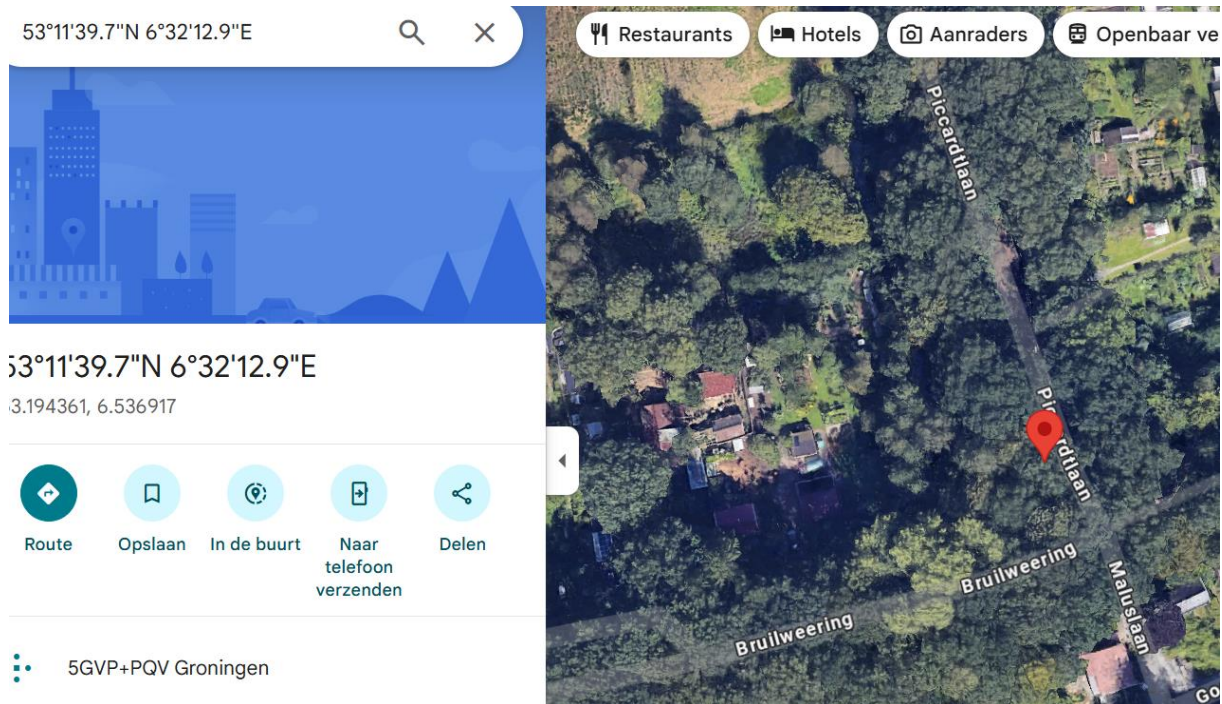

Relevant screenshots + motivation

During a raid, several smartphones were confiscated with some interesting photos on them. Analyze the jpeg file with the EXIF tool and document the following metadata for this file. Download the file: oldcar.jpg from Brightspace, copy it to your Ubuntu VM.

- Identify phone brand/type

```
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ exiftool oldcar.jpg
ExifTool Version Number      : 12.76

```

- Are there GPS coordinates known?
- o If yes: look up the location in Google maps and Streetview
- o In which city was this photo taken?

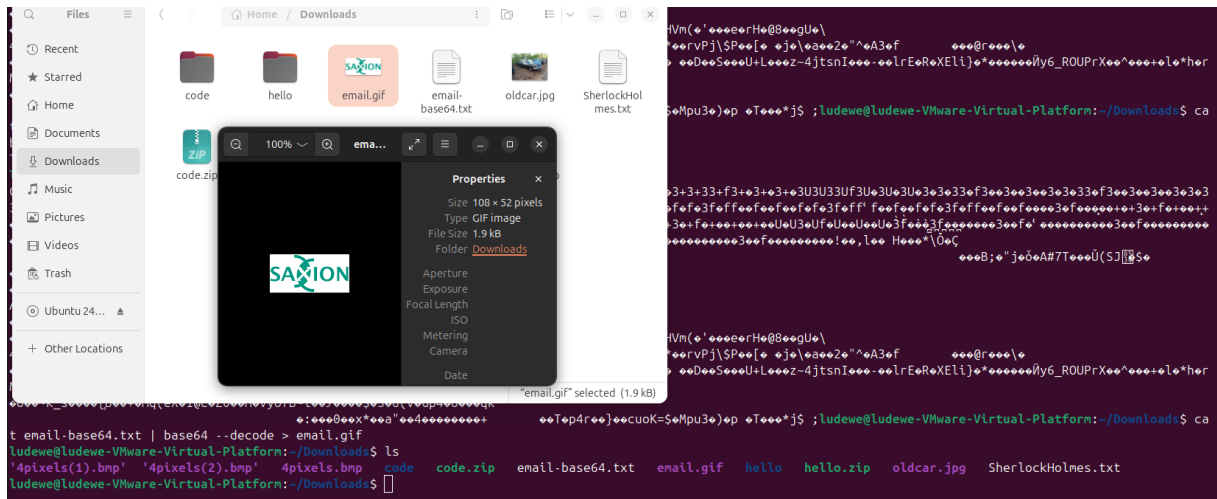

Groningen!

- Rename the file to oldcar. (So you've removed the file extension)
- In the terminal, type the command file oldcar.
- Does Ubuntu still consider it to be a jpg file?

```
'4pixels(1).bmp' '4pixels(2).bmp' 4pixels.bmp code code.zip hello hello.zip oldcar.jpg SherlockHolmes.txt
ludewe@ludewe-Virtual-Platform:~/Downloads$ ls
'4pixels(1).bmp' '4pixels(2).bmp' 4pixels.bmp code code.zip hello hello.zip oldcar SherlockHolmes.txt
ludewe@ludewe-Virtual-Platform:~/Downloads$ file oldcar
oldcar: JPEG image data, JFIF standard 1.01, aspect ratio, density 1x1, segment length 16, Exif Standard: [TIFF image data, big-endian, direntries=10, manufacturer=motorola, model=moto g(6) play, xresolution=160, yresolution=168, resolutionunit=2, software=aljeter-user 9 PPP529.55-35-18-7 6a0d0 release-keys, datetime=2020:11:07 15:08:57, GPS-Data], baseline, precision 8, 4160x3120, components 3
ludewe@ludewe-Virtual-Platform:~/Downloads$
```

Yes it still considers it a jpg file.

Decode this BASE64 String, and save the output as a binary gif file. To do this, use the base64 command on the Ubuntu VM. Read the man pages of the base64 command on your Ubuntu VM and find out how to do this. TIP! Figure out how to send output to a file instead of the screen on Linux:

Assignment 5.8: Steganography

Relevant screenshots + motivation

```
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ steghide extract -sf apple2.jpg -xf apple3.txt
Enter passphrase:
wrote extracted data to "apple3.txt".
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$ cat apple3.txt
Hello class.
You have almost completed Week 5.
ludewe@ludewe-VMware-Virtual-Platform:~/Downloads$
```

Assignment 5.9: Capture disk images

Make relevant screenshots + motivation:

- Proof that the Debian 13 server stored a back-up image of the Ubuntu 24.04 Desktop VM.
- Proof that you can restore the back-up image into an empty VM.

```
